

EE422C Project 3 (Word Ladder) Team Plan

Alan Sun , as79972

William Gu, wg4792

Fall 2019

Alan and William both attempted to write the BFS methods separately, only Williams worked, and both sat down together to write and debug the DFS method.

Five test cases were written by Alan and William together.

We spent approximately 7 hours together in the same room.

The final testing was done together.
